

Mohammad Nour Alali

Full-Stack Software Engineer

mohammednoor.dev0@gmail.com • github.com/mnoNoor • mno-noor.vercel.app

SUMMARY

Full-stack developer with experience in React, Node.js, and SQL/NoSQL databases. Built Uni Store, a bilingual student book marketplace, and Ishara, an Arabic Sign Language recognition platform. First Place, University Innovation Pioneers Camp 2025. Seeking a full-stack role to grow and contribute on a real team.

PROJECTS

Ishara — Arabic Sign Language Recognition

In active development

Full-stack platform for recording and translating Arabic Sign Language across various regional dialects. Hand landmarks are tracked client-side with MediaPipe, designed to help people with hearing impairments communicate with the rest of society. It also features sign language learning, error correction, and demonstration of the accuracy of executed signs. Furthermore, it is equipped with algorithms such as DTW with Sakoe-Chiba banding for fast comparison.

Technologies: React, TypeScript, Vite, Express, Drizzle ORM, PostgreSQL, MediaPipe

Uni Store — University Book Marketplace

Full-stack marketplace where students list, browse, and sell used textbooks. Built JWT authentication with HTTP-only cookies, role-based access across user/admin/superadmin tiers, Cloudinary image uploads, and Redis-backed rate limiting. Supports Arabic and English with automatic RTL/LTR switching, and documents 12+ endpoints with Swagger. (2026)

Technologies: React, Node.js, Express, MongoDB, Redis, Cloudinary, JWT, Tailwind, i18next

Telegram Moderation Bot — regex-based spam and obfuscated-content detection, running live in a 10,000+ member community, with a MongoDB-backed admin dashboard. (Node.js, Telegraf.js, MongoDB) (2026)

SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend: React, Tailwind CSS, Vite, React Router, Zustand, TanStack Query, i18next

Backend: Node.js, Express.js, RESTful APIs, JWT Auth, Zod / Joi

Databases: MongoDB, PostgreSQL, Mongoose, Drizzle ORM, Redis

Tools: Git/GitHub, Docker, Postman, Cloudinary, Swagger, Helmet/CSP

Applied ML/CV: MediaPipe hand tracking, Dynamic Time Warping (DTW)

Languages: Arabic (Native), English (C1)

EDUCATION

Syrian Virtual University — B.S., Software Engineering (In Progress)

AWARDS

First Place — University Innovation Pioneers Camp (2025)
